

SPECIFICATIONS FOR POLICE 4 DOOR SEDAN

2007 Dodge Charger

SSP7-4

Vehicles are required to be equipped with standard factory equipment unless dealer installation is permitted. Additionally, vehicles must comply with Federal Government regulations and include, but not be limited to, the following bid requirements:

Airbags: Driver & front passenger air bag passive restraint system.

Air Conditioning: System designed to prevent component damage due to high speed driving.

Alternator: 160 amp designed for patrol car operation.

Body Side Molding: Side molding required, including installation on front doors.

Brakes: Power-assisted anti-lock disc brake system required.

Cold Climate Package: (a) Heavy duty battery. (b) Engine block heater.

Color: White exterior. Dark gray interior. Trim to be color coordinated.

Cooling System: Maximum size, police type cooling system incorporating "coolant recovery."

Cruise Control: Factory installed speed control required.

Defroster/Heater: (a) Hot water, fresh-air type (largest size). (b) Factory installed electrical grid type rear window defroster required.

Engine: High performance V6 (Largest cubic inch displacement available in this model). Required to meet the Michigan State Police vehicle performance standards.

NOTE: Vehicles failing to meet performance standards must be modified as required at no cost to the State of North Dakota provided vehicle has been serviced according to manufacturer's instructions.

Floor Covering: Full carpet.

Headlights: High and low beam quartz-halogen headlamps w/battery saver. If equipped with daytime running lights, design shall incorporate a means to turn the lights off at driver's discretion.

Hood Latch Release: Inside latch release for engine hood.

Inspection: Prior to acceptance of delivery to the State of North Dakota, dealer shall schedule a pilot inspection with a representative of the North Dakota Department of Transportation and the North Dakota Highway Patrol in order to determine compliance with the specifications.

Lights, Switches & Headliner: (a) Engine, glove and trunk compartment lights. (b) Factory installed map/dome light mounted on center of headliner approximately 19.5" from windshield molding, operation to be independent of other lights. (c) No interior light to be automatically illuminated by open doors.

Locks: (a) Power door locks required (driver/front passenger operated). (b) Four keys furnished with each car. Third and fourth key may be dealer supplied on original equipment blank. All locks on car keyed alike, however, a different key for each car. (c) Rear door handles required to be capable of being inoperative (acceptable to be inoperative by use of child safety lock switch).

SPECIFICATIONS FOR DODGE POLICE 4 DOOR SEDAN – Page 2

- Mirrors:** (a) Interior with day-night capability. (b) Both left and right side exterior with interior remote control. If available, defroster capability requested.
- Police Package:** Vehicle to be equipped as a police package designed for police use.
- Radio:** Standard features including at least an AM/FM/clock.
- Radio Noise Suppression:** Radio noise suppression package required, to include any optional grounding straps. Vehicle shall not interfere with signals received or transmitted by the mobile police radio system nor shall vehicle systems be affected by the operation of the police radios.
- Seat Assembly:** (a) Front seats required to be heavy duty bucket type with heavy duty cloth. Drivers seat to be six-way power adjust. At least the driver's seat to have heavy-duty construction designed for rugged use and comfortable foam-padded seat cushions and backs. To permit installation of equipment, a minimum width of ten inches is required between the bucket seats. (b) Vinyl upholstery for rear seat.
- Speedometer:** One MPH increments, approximately 0 to 160 mph scale with factory certification and labeling required. If equipped with digital speedometer, 1 mph increments required.
- Spotlight:** 6" diameter spotlight with clear halogen bulb, windshield pillar mounted and factory installed on driver's side.
- Steering:** Power steering with steering gear that affords maximum "firm feel" and fast return characteristics designed for high speed pursuit driving.
- Steering Wheel:** Tilt type steering wheel required, round with anti-slip surface.
- Suspension System:** (a) Heavy duty springs, front and rear. (b) Heavy-duty shock absorbers. (c) Heavy-duty stabilizer bars front and rear.
- Tires:** Police pursuit tires all-season radials with black sidewalls. Speed rating to meet or exceed vehicle performance capabilities.
- Tools:** Wheel wrench and jack.
- Transmission:** Four speed fully automatic, heaviest duty available.
- Trunk Covering:** Standard carpet lining, full floor.
- Trunk Release:** Deck lid release button on drivers door, if available.
- Wheels & Covers:** 18" heavy-duty construction, designed for police use, black in color with full bolt on wheel covers. Compact size spare mounted in the trunk.
- Windows:** (a) Side windows electrically powered with active controls for driver and front passenger. Master lock switch for all windows for driver's door. (b) All glass full solar tinted.
- Windshield Wipers:** Multiple speed electric wiper/washer with intermittent feature.
- Wiring Diagrams:** One text or electronic copy of wiring diagrams/vehicle schematics requested for use by equipment installer.
